

Commercial Vegetable Insects

3/09

Tennessee is now officially part of the **Southeastern US Vegetable Crop Handbook**, therefore, we do not have a separate Vegetable Crop Insect Control Section for the Insect and Plant Disease Control Manual.

Please refer to

www.citrusandvegetable.com or www.growermagazine.com

in order to access the handbook on-line.

In the Southeastern US Vegetable Crop Handbook there is a section called “**SEVG Contents**” with Variety, Cultural, Production Information including Sprayer Calibration and Pesticide Information, and a section called “**SEVG Tables**” with Insect, Plant Disease, and Nematode Control Recommendations, Greenhouse Sanitation, and Chemical Weed Control Recommendations.
